Pet Name	: Dog – Zayn	**Age/Gender**	: Male
Owner name	: C/o Ashita Arora		
Reference by	: Self.	**Sample Collection**	: 10/09/2025

URINE CULTURE & SUSCEPTIBILITY TEST REPORT

SPECIMEN	:	Urine
GRAM'S STAIN	:	Few pus cell, Few gram negative bacilli seen.
CULTURE	:	**Growth Detected**
ORGANISM ISOLATED	:	**Escherichia coli**
COLONY COUNT	:	< **10^3 CFU**
COMMENTS	:	Aerobic culture and susceptibility performed as per human CLSI guidelines .Kindly correlate with clinical findings.
INTERPRETATION	:	•The above organism was isolated at incubation at 37°C. Microscopy and aerobic urine culture performed on an uncentrifuged urine as per ASM (American Society of Microbiology). •Colony counts are of significance in urine culture. Colony counts greater than 100000 CFU/ml are considered significant and suggestive of Urinary tract infection. Colony counts lesser than 100000 CFU/ml should be correlated clinically and treated with clinical discretion. •Antibiotic susceptibility test is done using Automated Vitek 2 Compact system. The VITEK 2 system is an automated equipment which provides rapid and accurate identification and susceptibility testing results. All results included in the Vitek card are interpreted along with MIC [Minimum Inhibitory Concentration] values in accordance with Clinical and Laboratory Standard Institute [CLSI] Guidelines. •For antibiotics not available on Vitek, antibiotic susceptibility is performed using disc diffusion method and reported as per CLSI guidelines.

ANTIBIOGRAM- ANTIBIOTIC SUSCEPTIBILITY REPORT

ORGANISM: Escherichia coli **METHOD: VITEK 2 method**

ANTIMICROBIAL	MIC (ug/mL)	INTERPRETATION
PENICILLINS		
AMPICILLIN	-	**RESISTANT**
AMOXICILLIN/CLAVULANIC	<=2	SUSCEPTIBLE
AMPICILLIN /SULBACTAM	-	SUSCEPTIBLE
PIPERACILLIN /TAZOBACTAM	<=4	SUSCEPTIBLE
CEPHALOSPORINS		
CEFAZOLIN	-	**RESISTANT**
CEFUROXIME	4	SUSCEPTIBLE
CEFUROXIME AXETIL	4	SUSCEPTIBLE
CEFIXIME	-	SUSCEPTIBLE
CEFPODOXIME	-	SUSCEPTIBLE
CEFOPERAZONE	-	SUSCEPTIBLE
CEFOTAXIME	-	SUSCEPTIBLE
CEFTRIAXONE	<=0.25	SUSCEPTIBLE
CEFEPIME	<=0.12	SUSCEPTIBLE
CEFOPERAZONE SULBACTUM	<=8	SUSCEPTIBLE
FLUORO(QUINOLONES)		
CIPROFLOXACIN	<=1	SUSCEPTIBLE
OFLOXACIN	-	SUSCEPTIBLE
NORFLOXACIN	-	SUSCEPTIBLE
LEVOFLOXACIN	-	SUSCEPTIBLE
AMINOGLYCOSIDES		
GENTAMICIN	<=1	SUSCEPTIBLE
AMIKACIN	<=2	SUSCEPTIBLE
CARBAPENEMS		
IMIPENEM	<=0.25	SUSCEPTIBLE
MEROPENEM	<=0.25	SUSCEPTIBLE
ERTAPENEM	<=0.12	SUSCEPTIBLE
OTHERS		
TIGECYCLINE	<=0.5	SUSCEPTIBLE
COLISTIN	<=0.5	SUSCEPTIBLE
COTRIMOXAZOLE (TRIMETHOPRIM/SULFAMETHOXAZOLE)	-	SUSCEPTIBLE
FOSFOMYCIN	<=64	SUSCEPTIBLE
NITROFURANTOIN	-	SUSCEPTIBLE
